Highlights

- 4+ years of software engineering experience
- Strong expertise in Golang backend development and distributed systems
- Experience designing gRPC microservices and cloud-native applications
- Hands-on experience with Kubernetes, Docker, and GitLab CI/CD
- Built AI systems using LLMs, RAG pipelines, multi-agent workflows, and tool integrations
- Experience developing reusable platform libraries and internal developer tooling

Work Experience

Mercury Studio

Dec 2024 – Present

AI Platform Backend Services

- Designed and developed AI-powered backend services in Golang, integrating LLMs, RAG pipelines, and document retrieval systems for internal knowledge management
- Built multi-agent workflows with reusable skills and tool integrations to automate business processes and AI-assisted operations
- Designed and implemented gRPC-based microservices following distributed system principles
- Developed internal Golang libraries and SDKs shared across multiple backend services
- Deployed and operated containerized services on Kubernetes environments

TMA Solutions

Apr 2024 – Dec 2024

Blockchain Platform Services

- Developed backend services using Golang for blockchain-based applications
- Built and tested smart contracts using Solidity and Foundry
- Implemented real-time game services using Golang WebSockets
- Developed multiple platform services including Notification, Storage, and Ecommerce

TMA Solutions

Mar 2024 – Apr 2024

AI Email Automation

- Built an AI-powered email response system using Golang and Ollama

- Integrated LLM capabilities to automatically generate responses to customer queries
- Designed backend workflows to process and classify incoming emails

TMA Solutions

Dec 2023 – Mar 2024

Decentralized Exchange (DEX)

- Implemented CI/CD pipelines using GitLab and Docker
- Developed smart contracts using Foundry inspired by Uniswap liquidity pools
- Built frontend features using Next.js for liquidity management
- Processed blockchain data using Subsquid indexing

TMA Solutions

Sep 2023 – Dec 2023

Educational Platform (Kahoot Alternative)

- Built CI/CD pipelines using GitLab, Docker, and DockerHub
- Developed real-time quiz features using Golang, WebSockets, and Gin
- Built frontend components using Next.js and integrated MinIO storage
- Managed source control using GitLab

TMA Solutions

Mar 2023 – Sep 2023

NFT Marketplace

- Developed frontend features using React and Next.js
- Built backend APIs using NestJS for marketplace operations
- Integrated blockchain functionality with Polygon Mumbai and Goerli testnets
- Containerized services using Docker and Docker Compose

IVS Joint Stock Company

Feb 2022 – Mar 2023

Workspace Management Platform

- Developed backend services using Golang
- Built REST APIs supporting project management workflows
- Implemented frontend features using React

Education

Bachelor of Information and Technology

2018 - 2022

University of Nha Trang, Nha Trang, Vietnam
